Of course Windows 7 64 bits updated :) You help is. I've come across the very same question in StackExchange: In short, MS has discontinued most older Skypes, not only by making them not available, but also by making the server reject them.. Similar help and support threads Thread Forum I have WIN 7 and Skype 7 12 0 101 The other side hears noise, it seems only after he she speaks, and the noise goes on for about 30 seconds, during which they hardly hear me.. The post includes a link to a working alternative 6 21 download link (the latest one before they destroyed the whole UI with the 'everything is a tablet' design).. While it has been already infected with some of the Win8 guidelines (mostly unrecognizable icons, squared everything, small things like that) it's mostly usable like all other previous non-MS versions.
